COLLECTION 2018/2019

WORK FOOTWEAR FOR HOTELS, RESTAURANTS, CANTEENS, CATERING

TESTED BY RESTAURANT WORKERS:

"I would definitely recommend SIKKA BUBBLE to my co-workers. I can walk all day in these shoes without getting sore legs and feet. And it's just perfect having a work shoe that doesn't look like a work shoe, but which has a nice and neutral design for both men and women".

Mikkel Kongerslev, Restaurant Manager, Skagen Fiskerestaurant.

Some people just go a little further for others. From the hardworking chef in the kitchen to the busy server in the restaurant or café. This requires footwear that is not only approved for work but that also feels right. Even after a long shift.

At Sika Footwear we have a wide range of work footwear for hotels, restaurants, canteens and catering. Our products are developed in close collaboration with users, and are designed to provide maximum comfort and safety in the workplace.

In this catalogue you will find exactly the right work footwear for your industry and your job. Happy reading.

Footwear made for work

Work footwear is a matter of trust! User safety and working ability is directly dependent on our ability to deliver. And with almost 150 years' experience, you can sleep soundly at night knowing that you have the leading professionals in the industry on the case.

At Sika Footwear we develop, manufacture and supply footwear for working people. From the restaurant server with the long shift to the contractor who builds roads and bridges. Needs vary, but one thing remains the same: Footwear should fit, both to the feet and to the work that needs doing!

The Danish company Sika Footwear took its first steps back in 1870. Not that age itself is the same as quality, but it's hard to argue almost 150 years of experience and fine-tuning. Today, we use this knowledge to develop our own products from scratch, as well as selecting and marketing the absolute best brands on the market.

Yes - we know something about footwear here at Sika Footwear. But for us, it's just as important to listen to those who are actually going to be wearing the shoes during their working day. Therefore we develop our own products in close collaboration with the users, because ultimately, it is their opinion that counts.
